RE Closeout Reports for Building 367 and Trailers 121A, 334B, and 760A

Dear Mr. Legare

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the Closeout Reports for Building 367 and trailers 121A, 334B, & 760A, dated February 13, 2003. We appreciate being provided these Closeout Reports for our information.

As we have previously requested, Closeout Reports should identify all removal activity and include a map of the facility identifying the structures involved, those removed, and the location of remaining infrastructure and its condition. Infrastructure includes all remaining materials and their location, and includes slabs, piers, footings, water pipes, gas lines, electrical conduits, drain lines, PWIs, sewer lines, etc. These maps are necessary for possible ER and/or future stewardship concerns.

The information provided for B367 does not specifically address the ultimate disposition of the concrete slab, only the "above grade building debris." Please provide information on the disposition of the concrete slab associated with B367.

It is assumed, since not discussed, that the sewer lines associated with Trailer 760A were properly flushed as indicated in the Facility Disposition RSOP, which is supposed to be followed for all facilities.

Revised Closeout Reports for both B367 and T760A should be provided to properly address these concerns.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

Steven H. Gunderson
